New Beauty for the New Ford

The New Ford Coach

The introduction of the new Ford bodies has set a new high standard of motor car value. From the new deep radiator to the tip of the curving rear fender, there is an unbroken sweep of line—a flowing grace of contour gaining added charm from the rich and attractive colors.

You will take a real pride in the smart style and fresh new beauty of the Ford, just as you will find an ever growing satisfaction in its safety, comfort, speed, acceleration, ease of control, reliability and economy. In appearance, as in mechanical construction, craftsmanship has been put into mass production; new beauty has been added to outstanding performance.

A feature of unusual interest is the use of Rustless Steel for radiator shell, head lamps, cowl finish strips, hub caps, tail lamp and other exposed metal parts. This steel will not rust, corrode or tarnish, and will retain its bright brilliance for the life of the car. Here, as in so many other important details, you see evidence of the enduring quality that has been built into the new Ford.

CARD OF THANKS

Mr. and Mrs. W. E. Glenn desire to thank friends and neighbors for many kindnesses extended the time Mrs. Glenn and son were patients in Vulcan Municipal Hospital.

CARD OF THANKS

Mr. W. Myles desires to thank many friends and neighbors for assistance and sympathy at the time of his bereavement, and for the lovely flowers sent to the funeral of the late Mrs. Myles.

KIRKCALDY NEWS

Mr. and Mrs. George Skovemand and family of Stavely were visitors at the home of Mr. and Mrs. W. H. Baldwin on Sunday.

Mrs. John Ellsen was a Lethbridge visitor one day last week.

The Kirkcaldy Young People's play is coming along fine. It will be held in the pool hall on March 7th at 8 o'clock. Dance to follow in community hall.

RED CROSS NEWS

Mr. and Mrs. D. L. Doane and daughter, Beryl, are Calgary visitors for a few days this week.

Mrs. Millett's friends are all sorry to hear of her serious condition and hope for a speedy recovery.

Our hockey boys seem to be doing fine nowadays, especially on their own ice.

Miss McRae is in Calgary working in a Safeway Chain Store.

Mr. and Mrs. Alva Fulton, Mr. J. Fulton and George, Mr. Clare Dunham and Fred McKinnon were over to the hockey games at High River this week.

Mrs. Melvin Fulton returned from High River after spending a week with her parents.

The majority of the young folks of the district took in the dance at Sunset Friday night and report a good time.

FOR CHEAPER SMOKE

Tobacco growers of south-western Ontario are asking Hon. C. A. Dunning for reduction in excise tax on cigarettes. A reduction in the tax it is claimed, would reduce the wholesale smuggling from U.S. to Canada. By reducing this tax the price of Canadian cigarettes from home-grown tobacco would decrease with a consequent increase in consumption of the Canadian article.

The membership of the Vernon Airplane Club is now sufficiently large to satisfy the requirements of the Department of National Defence for the issuance of two Moth planes. The airport site is declared excellent by Major Tudhope.

Father—"Are there half fares for children?" Conductor—"Yes, under fourteen." Father—"That's all right I've only five."

WILL PRESENT PLAY

The Vulcan Amateur Dramatic Society will present, at the Vulcan Theatre, tonight and tomorrow night, a comedy riot in three acts entitled "The Arrival of Kitty." A report of this entertainment will appear next week, and it may be said in advance of the presentations by this society warrant a liberal patronage on this occasion.

The W. A. of St. Aidoem's Church will hold a daffodil tea and sale of home cooking at the home of Mrs. W. S. Hill, Saturday, March 1st. The regular Easter bazaar will be held the Saturday before Easter, April 19th. Feb. 20-2-c

LITTLE ARTISTE THRILLS AUDIENCE

The recital given Thursday evening by Miss Joan Mayhood was well rendered and was of the highest type of character readings ever presented in Vulcan. The little lady being just eleven years of age, delighted her audience with her many impersonations. The program included the following numbers:

"Little Battese," Drummond; "Pearlie reports the Ladies' Aid Meeting," Nellie McClung; "Danss' report card"—Joan Mayhood.

Piano duet, "March of the Mittens Men,"—Miss Mable McPherson and Miss Koneta Merkle.

"The story of Bruce," a fire dog of New York—Joan Mayhood.

Piano solo, selected—Miss Beulah Walker.

"Mrs. Smythe-Brown Buys a Book" monologue in costume; "The Bairnes' Cuddle Doon," Alex. Anderson—Joan Mayhood.

Solo, "Sing Joyous Birds,"—Mrs. W. Almond.

"Who's Afraid?" substituted; "Kueen O'Sheba," (story of a little darky girl, taken from life); "Home" with musical accompaniment, Edgar A. Guest; "A Little Life," G. DuMaurier—Joan Mayhood.

Miss Beulah Walker, Miss Merkle and Miss McPherson who so generously gave of their time and talents in making this programme a success need no introduction, also Mrs. Almond who rendered two numbers. Much praise is given these artists in the splendid manner in which they entertained the audience with the numbers given.

LOCAL ITEMS

K. R. McLean, of McLean & Anderson, Sight Specialists, 224 8th Avenue West, Calgary, visits the King Drug Store Saturday, March 1st. Make appointments at Drug Store.

The Clover Leaf Lodge are planning a sale of Home Cooking, Farm Produce, and Sewing, (tea will be served) to be held in the Sunday School Room of the United Church on Saturday, March 15th.

Mr. J. B. Ross received a telephone message this morning to the effect that his step-son, Mr. George M. Hatch, had died in Calgary. Sympathy is being extended to Mr. and Mrs. Ross.

Mr. J. H. Rackett, of the Blackie district has authorized Alex Thompson, to sell by public auction at his farm, 7½ miles north-east of Blackie, a full line of farm machinery, milk cows, horses, etc., on Friday, March 7th, 1930, at one o'clock.

A delightful whist party was held at the home of Mrs. Dave McIntyre on St. Valentine's day in aid of the Catholic Women's League. Prizes were awarded as follows: ladies' first Mrs. Herman Spankie; consolation, Miss Jessie Packwood. Gent's first, Mrs. Jack Packwood and consolation to Mr. John Shaw. An informal lunch was served.

Mr. Frank W. Shaw, 23-24-25, four miles west of Vulcan, had a visit the other day from Mr. Lennox of the Dominion Forestry Department, who was glad to note the growth of trees on Mr. Shaw's farm; among these are a drive planted in 1923 and now in full growth, and a shelter belt one mile long which Mr. Lennox declares is the finest in his territory. These trees are illustrated by photographs which we regret we are unable to reproduce.

CHURCH OF CHRIST NOTES

Services will be held at the Church of Christ at the usual hour next Lord's Day. Communion 10.30, message following. The bible school is keeping up with its record attendance and the interest is increasing in the illustrated lessons. Come and take a part in this contest and help others to know their scriptures.

Christian Endeavor 7:15 and all the young people are invited to take part in this meeting. Junior Endeavor 7 o'clock Wednesday. The interest is growing in this department.

Midweek prayer meeting and study class 8 o'clock, Wednesday evening. The study of Matthew is progressing and many are enjoying the study class.

Preaching services at 8 o'clock.

Alberta Young Men Will Take Positions in Africa

The following reprint from an Edmonton paper has reference to two young geologists whose selection for important posts in Africa will be of particular interest to Vulcan people.

Mr. David W. Ross is a nephew of Mrs. D. C. Jones and Mr. Harold R. Elves is in the same way related to Mr. R. L. Elves.

Both young men leave for Africa in May, and will have the best wishes of the community for success in their important undertaking.

"Wanted. Two geologists with a knowledge of the pre-Cambrian for prospecting in northern Rhodesia. One year certain at forty pounds per month. Free transportation to district and three months' holidays with pay at the end of three years' work.

Such a notice was posted in the university a few days ago and as a result two Alberta geologists, David W. M. Ross and Harold R. Elves will leave for Africa this spring. Both Ross, who is an Edmonton boy residing at 8636 108 st., and Elves, whose home is at Cayley, Alberta, are seniors in mining and geology and have had considerable experience at the type of work required in this field.

The work of Ross and Elves will be geological in nature as the company has no mines in operation at present although it has plans for the establishment of three shafts in rich ore bodies. The ores are essentially copper although many other metals such as cobalt, gold, lead and zinc are found, and the company is interested in several diamond mines. The plans of the company are such that they will map out about 500 million tons of ore before they proceed to mine and this mapping requires the services of a large number of geologists.

The Rhodesian Anglo-American corporation has 62 men working at the present time and of these 55 are geologists. Twenty-four of the latter are Canadians.

Included in this large staff are graduates of no less than twenty-seven universities, among which McGill, Toronto; British Columbia, Manitoba and Alberta are represented. G. T. Walters, a graduate of 1926 is the Albertan representative at present.

The men travel in pairs and have from 10 to 20 natives each, to move camp and attend to their wants. Game is plentiful and each prospector carries a rifle for possible protection as well as a source of variety in diet.

Dr. J. A. Allan, head of the department of geology at the University of Alberta, who selected these men, expects that David Ross and Harold Elves will leave early in May and proceed to London to obtain directions for their future work.

From Southampton they will travel seventeen days by boat to Cape Town South Africa, and from there five days by rail to Broken hill in northern Rhodesia, the base of their work. They work for one year and may be retained for two more years at the option of the company with three months holidays allowed. At the end of this period they may, at their option, continue with the company as senior geologists.

In addition to being a great personal triumph for both the chosen geologists, it is a source of great satisfaction to the University of Alberta that this institution has been called upon to supply men for this work. It also indicates that the possibilities for Canadian graduates in science are rapidly extending not only in Canada but all over the empire.

WEDDING BELLS

JACOBSON—THOMPSON

A very pretty wedding was solemnized at the home of Mr. and Mrs. Robert Thompson of Westward Ho on Thursday, February 13th, when Lily Louise, their eldest daughter, became the bride of John Wesley, youngest son of the late Mr. and Mrs. Ole Jacobson of Vulcan, Alberta, the Rev. W A. Peeprose of Westerdale officiating

The room was beautifully decorated in evergreens and pink roses.

The bride entered, escorted by her father to the strains of the wedding march from Lochengrin, wearing a gown of apple green georgette and carrying a bouquet of sweetheart roses. The bridesmaid, Miss Lee Wonsmos of Westward Ho, wore a gown of peach georgette. The bridegroom was attendde by Mr Arnold Rushfeldt of Vulcan.

Following the ceremony the bridal party and twenty-five guests sat down to a lovely wedding supper, the table being beautifully decorated and centered with a tiered wedding cake.

The groom's gift to the bridesmaid was a gold bracelet and to the groomsman a pair of gold cuff links.

The happy couple were the recipients of many beautiful presents showing the esteem in which they were held by numerous friends. Mr. and Mrs. Jacobson will make their future home in Spokane, Washington.

HOCKEY

NANTON, 3, VULCAN, 1.

Scoring three goals in the first period, and practically maintaining this advantage for the balance of the game, Nanton defeated Vulcan in an exhibition contest at the arena on Saturday evning last by a 3-1 score. No doubt the prevailing chinook was responsible for the small attendance, quite a number of people being given the impression that the game had been called off. Under the circumstances however, the ice was in good shape, and the fans that were present were treated to a wonderful exhibition of hockey, especially in the dying minutes of the contest when Vulcan tried hard to get the equalizing goals.

The first period spelt defeat for the homesters, three goals in quick succession being scored by the Nanton sextette. They came so fast that it looked like there might be a regular scoring bee, but the deluge ended as abruptly as it came, probably because Nanton decided on sound defensive tactics. The second period was productive of being the most interesting of the evening, when the visitors were clearly outplayed and Vulcan notched its only goal of the contest. Many spills and thrills were witnessed in the third stanza and while the play was about even neither team was able to bulge the twine, although both goalies had remarkable close calls.

Lorne Leverington refereed the game to the satisfaction of everyone.

The line-up follows:

Nanton—Goal, Storie; defense, Boutland, Hallett; forwards, Coutts, Dorsey, Rea; subs., Thom, Little, Crockett.

Vulcan — Goal; C. Clark; defense, Monkman, Babe Kaiser; forwards, Ferguson, Marshall, Brown; subs., Palmer, Seaman, Bill Kaiser, McDonald.

Temporary suspension of hockey has resulted as far as Vulcan is concerned, poor attendance being responsible. It had been intended to include the wind-up of the Wheat Belt League here as Vulcan were returned winners this season. The team is also indebted to Gleichen, Stavely and Nanton for return contests. Whether operations will be resumed or not is a matter of conjecture.

Mr. Arnold Rushfeldt was a guest last week at the home of Mr. and Mrs. Robert Thompson of Westward Ho.

LOCALS WIN AT BARONS

Vulcan rinks figured prominently and successfully in the Little Bow Association bonspiel, held on Wednesday and Thursday at Barons. The rink with A.G. Dickinson as skip won the Burns' Cup and the rink directed by Dyce Allan was second in the Brewery Cup contest, the premier competition. There are but two events in the 'spiel. All eight of the Vulcan competitors won individual prizes.

ENSIGN W. I.

The February meeting of the Ensign Women's Institute, held this week at the home of Mrs. L. Elston, opened by sing "Old Black Joe," and reading of the creed. Roll call was answered by "Valentine Verses." Final arrangements were made for the Hard Times Dance to be held February 14. After a general discussion it was decided that a reading lamp be purchased same to be placed in the school house for general use of the community. Mrs. Mullins and Mrs. Parker gave reading on "National Events." wo solos were rendered by Mrs. E. A. Elston acompanied by Mrs L. Denis. Two songs were contributed by Mrs. Myers and Mrs. Muchle.

ROYAL MUNICIPALITY ELECTS OFFICERS

At the annual meeting of the Municipal District of Royal, held in the I. O.O.F. hall, Vulcan, on Saturday, February 15, Mr. H. O. Lundgren was nominated as councillor for division No. 1 and the contest betwen him and Mr. Seaman the present councillor, will be the only election this year

Messrs. Smith and Eamor were elected by acclamation for their respective divisions.

Mr. Alex. Smith was elected, by acclamation, as representative for Virden Hospital district, as was also Mr. N. P. Jensen for High River Hospital district.

The organzation meeting of the new council will take place on Thursday, March 13.

Mr. and Mrs. Dewie Doane are in Calgary this week to attend the Rebekah and Odd Fellow convention. Miss Beryl Doane accompanied them.

CANADA INVENTS

A Canadian historian has taken the time and trouble to verify certain facts as to Canada's contribution to general progress of the world. It will surprise the average Canadian to know that—

Canada built and sent the first steamboat across the Atlantic and was first to demonstrate the first compound steam engine in the history of the world.

Canada built and demonstrated the first submarine telegraph and first railway sleeping cars.

Canada demonstrated the first practical electric railway in the world; built the world's first electric stove; and originated the idea of electric heating.

Canada pioneered electric chemistry with the discovery of calcium.

Canada originated the idea of standard time which has since been adopted by all civilized countries.

Canada originated Marquis and other more recent wheats to build up commerce for Western Canada and U.S.

Canada first isolated helium.

Canada originated the idea of the telephone with the first long distance trials between Paris and Brantford.

UNITED CHURCH NEWS

The regular services at the United Church next Sunday, February 23 will be held at 11 a.m. and 7.30 p.m. A hearty invitation is extended to all.

Special music will be rendered at the choir.

Service at Red Cross at 3.30 p.m.

Adult bible class conducted by J.H. Wycherly Sunday afternoon at 2.30. This class is open to all and is growing in interest and numbers. Come and bring your friends with you. Music by the class orchestra.

The Ladies' Aid are planning to hold a tea and apron sale at Easter.

Mrs. Millet is a patient in the Vulcan hospital suffering from an attack of pneumonia. Many friends wish her a speedy recovery.

ALBERTA FINANCE

On Tuesday of last week Hon. R. G. Reid brought down Alberta's budget for the coming year, showing that it is the intention to tax the people of Alberta, some 650,000 in number, a total of $17,107,000 during the coming year, expenditures being forecast as only $73,000 less than that amount.

In 1918, at the peak of war prices, Alberta spent only $8,303,000, while it was 1920 before our expenditures ran into the $10,000,000 total.

There is no doubt that we have developed a tremendous capacity to spend money on governmental functions here in Alberta. The people, however, do not seem to be objecting very seriously to the trend, in spite of the fact that the present Government was elected on an economy cry. We were spending less than $900,000 a month when they came into power; today we are spending close to $1,500,000 a month, and only ten years have elapsed.

If we are not mistaken, this is the first year since the Farmer Government came into power that new forms of taxation have not been added. But with the possibility that times will not always be as prosperous as they have been in the past decade, we might have hoped that the Provincial Treasurer would have seen his way clear to emulate the Federal Budget and decrease or wipe out some of the taxes.—Lethbridge Herald.

AIR MAIL ROUTE

An air mail service for the West will open March 3. Westbound planes will leave Winnipeg 9 p.m. reaching Calgary at 4.30 a.m. Night flying is favored because more time can be saved. The stops on the main line are Regina, Moosejaw and Medicine Hat. The monoplanes to be operated in the service are of specially high power to prevail over prairie winds. Planes will carry a maximum load of 600 pounds and will have flying speed of more than 100 miles an hour.

Every hazard has been provided for. In case of forced landings, full instructions are given to the pilot respecting care of mail. A long list of pilots are already engaged to take over active service.

OUR MUSICAL ASSET

It must be conceded that from a community standpoint, no one organization furnishes more year to year enjoyment than the Elks' band. It is a very great asset to the spirit of all occasions. And band members emphasize unceasingly the inestimable value of Mr. Pickersgill's leadership. No one citizen is contributing more than he, to the community. It is a matter that deserves the consideration of all townspeople, that it is important to the development of the band, that Mr. Pickersgill's services are retained. Musicians and leaders of his standing do not often fall to the lot of small towns, and we are more fortunate than we realize in having had the benefit of his work. It is everyone's hope that we may retain him indefinitely.

When the strain and stress of league games are over, it is hoped that the senior team and the town might feel inclined to put on an exhibition game for the benefit of the Elks' band. The senior team is the best gate-getter that the town possesses to give a helping hand to an organization, which has done its part to furnish enjoyment for the fans at every hockey game this winter.

Unfuestionably the band is deserving of better support than it gets.

WON'T ENCOURAGE

Canada is no longer to campaign for new settlers. The immigration policy which has been under much criticism of late years will be vitally altered. Alterations which are planned will not be effective for some little time because of commitments already made.

No Britisher, Northern European or American who is physically fit and has the stipulated funds, will be discouraged from entering but on the other hand, there will be no campaigning for them.

Southern European immigration will be regulated by the wishes of the provinces and their capacity for absorbing them.

It is expected that many of the immigration agencies particularly in U. S. will be closed down as a result of the voluntary immigration. Closest co-operation between provinces and dominion will dictate all future action in this policy.

EARLY CHICKS

According to experimental farm experts it is conceded that early hatched chicks give the best results in egg production, particularly during the winter months when eggs are the highest in price. To breed early chicks comfortable quarters with artificial heat is necessary. Over a period of three years it was found that on the average it required 13.5 lbs. of coal per day to operate each brooder stove during the month of April, 9.8 during May and 9.3 in June.

ATTENTION TO SEED

The farmers of the district are bestirring themselves in the matter of the Seed Fair competitions. It has been noticeable that although this is a grain growing centre of vigorous and productive nature, yet it never figures in the Seed Fairs. It is doubtful if there are any competitors in this line in the district.

But from now, things are going to be different. The U.F.A. is urging all farmers to pay great attention to their seed sown this year with a view to entering the Calgary Seed Fair next year and the Regina Fair in 1932. Several of the local boys also have made application to enter the Wheat Pool competition.

The High River district has been well to the fore on numerous occasions in prize winning beef, in pure-bred cattle in sheep and swine competitions. So it is time that the wheat growers were advertising it also as a prize grain growing district.

TWO IN ONE

In connection with the resolution before the U.F.A. convention, urging government control of coffin selling and the undertaking business, the Coleman Journal suggests that the government liquor vendors be also appointed agents to take the orders for the coffins at the same time as they issue the permits for government liquors.

The bull sale at Kamloops this year is scheduled for March 19th and 20th. This show is becoming an important event in Western livestock records. A big list of Alberta entries has been received.

Shaw and Webster unite in a strong urge that a statement showing public debt, revenue and expenditures be published monthly in the Alberta Gazette. The Canada Gazette furnishes a monthly statement.

The gross value of mineral production in the Province of British Columbia for 1929 is estimated at $70,030,976, an increase over the previous year of $4,658,393, and a new high record.

WOMAN SENATOR

The appointment to the Senate of Mrs. Norman Wilson of Ottawa, meet with general favor. Mrs. Wilson is not only well qualified on her own merits for the honorable office, but comes of a family which bears honorable record in Canadian political history. Her father Senator McKay was an honorable member of the senate chamber, and Mrs. Wilson was brought up from childhood in the shadow of statesmanship.

UNFAIR INFLUENCE

Just think of it: On a recent Sunday, Drumheller hockeyists attended divine service and sought the prayers of the minister and congregation for their wonted success—and practically right away they were declared winners of their league and qualified to go further.—Blairmore Enterprise.

The members of Legislature, not content with talking all day, are now obliged to meet in session for three evenings every week.

The Tokio delegates to the Naval Conference have offered to cease any battleship construction for six years, until 1936.

In Ontario no liquor permits will be issued to young people between the ages of 21 and 25 years, unless a written request is made by the parents.

Indians on a reserve near Edmonton are sending protests to Ottawa, stating that they have not had an election for councillor and chief in ten years. The old chief is quite illiterate, and the younger Indians who can read and write are being deprived of any voice in affairs.

Two Scots were discussing the domestic troubles of a friend. "That woman leads Sandy an awfu' life," said one. "Humph! what else would ye expect?" asked the other. "He only coorted her for seven years, an' I hold that nae man can understand a woman in that time. Now I coorted Maggie Deans for twenty-two years —" "And did happiness follow the lengthy courtship?" asked an Englishman seated opposite. "I found oot at the end o' that time that I didna much care for the woman, an' cried aff!"

The "Right" Way

There's No Better Method
of reaching the people than through the medium of the Classified Advt. Everybody reads them, for they are news to those who seek something and likewise news to those having something to sell. To get what you want, let everybody know thru the Want-ad column of The Advocate. Use the Want-ads more—for any purpose—and we are satisfied that you will be gratified by the results. If you have lost anything, just put in an ad.

FOR SUPERIOR CONSTRUCTION
Whether the job in hand is repairing, or new construction, it pays to use building materials of dependable quality. Our knowledge of the requirements for all such work enables us to supply building materials of exactly the right grade for best results. Call or write for prices or other details.

"You certainly do, Johnny."

A few minutes later: "Ma, do I have to eat the beak too?"

Buy your Copper Carbonate here. Chemically mixed and guaranteed pure. 18c per lb. Place your order the next time you are in town.

MORE POWER FROM MANY NEW FEATURES

Far reaching improvements have been built into the already famous McCormick Deering Tractor to supply a still greater reserve of power. The accurately balanced, 4-cylinder, vibration free engine, produces a supply smooth flowing power far all applications. The new combination manifold gives exceptional fuel efficiency The oil filter, air cleaner, and fuel strainer protect the engine from dust and dirt. The control on the impeller-pump cooling system assures proper operating temperature.

Ball and rollsr bearings at 34 points reduce the friction all along the line. After sales service backed by one hundred years of manufacturing experience is your assurance of complete satisfaction.

DEEP TILLAGE

Interesting Article on Deep Tillage by Arrowwood Farmer

I would like to point out that the article which was published in your paper under date of January 30th form the U.F.A., did not give your readers who had not read the first article in that paper a very good idea of what I was trying to bring to their attention.

The cut used was to show what a 3 bottomed gang plow looks like when fitted with the subsoiler points which I have designed, but you failed to explain this to your readers and possibly many of them would not know just what it was.

The big idea behind what is known as the Killifer Deep Tillage system is to break up the subsoils to a sufficient depth to permit the soil to absorbed all the moisture just where it falls, and not allow a large part of it to run off into the low parts of the fields, or into the sloughs and creeks in place of keeping it where the crops which are seeded on the land will be able to make use of it.

In order to do this it has been found that in most soils it is necessary to loosen them up to a depth of 12 in. to 16 in., but in such a way that the subsoils will not be brought to the surface, as would be the case in deep plowing.

It has only been able to do this work by vary heavy cultivators which are very expensive, until I was able al my stubble land before the freeze-up.
to design the points, or shovels to attach to the plow beams.

As every farmer has a plow to suit the power he is using all he will need to do is to remove his plow bottoms and fit on the subsoiler points which can be made to fit any kind of a plow beam.

Stones do not bother them nearly as much as they will the plow bottoms as they simply hook on to them and root them out to the surface, or slide over them if they are too deep for the points to get a good hold on them.

As the points fit right on the front side of the beam and only need to extend enough below the end of the beam to keep the beam from riding of the little furrow they are almost indistructable, as they really reinforce the beam.

I am informed that there are a few men in the Vulcan, Blackie and Stavely districts who have become sufficient ly interested in the system to go to the expense of buying the expensive cultivators for doing this work, and what I wanted to do was to let every farmer who wanted to try this system out on his own land know that all he needed to do was to get these points made, which will cost less than plow shares and will last longer and be much less expense to sharpen and re-point.

The work should be done when the subsoils are as dry as possible so that they will just be raised a little by the points as they are moving forward through the soil and cause it to break up in lumps and leave the cracks for the top soil to trickle down into which will carry with it the bacteria which was spoken of in the former article, and later when the moisture come it will be able to settle down in these openings and remain down where it will be out of the reach of the sun and hot winds, until it is needed by the growing crop during the dry periods in the growing season.

I used this system last summer in place of plowing my summerfallow and after harvest I subsoiled nearly

What I plan to seed in the spring I only subsoiled 8 in. to 10 in. deep and what I plan to summerfallow this season I subsoiled 10 in. to 12 in. deep.

What I did not get done before the freeze-up I will finish as soon as the frost is out if the winter's snows have not put enough moisture in the soil to make the subsoil too moist to break well.

I plan to put the discs over all of it just as soon as the surface is dry enough to work so as to create a seed bed to germinate the weed seeds and to close up the moisture which has been made by the winter's snows.

At this writing, February 5, the snows have all melted and none of it blew off the field because the lumps and stubble which was left sticking up all over the fields held it where it fell and when the thaws came the water simply settled into the depressions which were caused where the lumps of soil were turned up. It froze and lay there in the form of ice until the next thaw came. Out in the stubble where he land was left hard and smooth the snows melted down until it forced ice about a half inch thick all over the surface of the field.

The ground underneath this ice was frozen as deep as the fall moisture had penetrated, about 3 to 4 inches deep, while in the loose soil where it had been stirred up with the cultivators the frost was only about one to two inches deep.

When the next thaw came the chinook soon drew the frost out of the loose soil around the borders of the ice in the little depressions and the water began to settle down into he loose soil and within 15 hours of the time the chinook wind started to blow the ice had all melted and settled away.

In the adjoining stubble field the layer of ice on top of the soil had to melt before the frost could be drawn out of the soil and as soon as the ice started to melt it began to travel to the lowest spots in the field, or off into the sloughs and coulees and down into the creek. There are a number of sloughs in one of my fields which have always filled up with water every winter, but there has not been a particle drained into them this winter.

I am confident that I have saved enough moisture on these fields to increase the crop next year by several bushels per acre by this subsoiling if we have another short crop on account of lack of moisture.

While at the U.F.A. convention last week I met my old friend, Mr. J. A. Lund of Barons, whom many of your readers will know and he said, "I saw a crop of barley when I was down in California in the winter of 1922-23, part of which was on land which had been "chiseled," as they called it, and the balance of the field had been plowed and worked in the ordinary way."

"When I saw the crop the part on the "chiseled" land stood about knee high and was a nice thick stand and a good dark green color and looked like a 40 bushel crop without any more moisture." "That on the plowed portion, and only a few feet away was about 4 to 5 inches high and all burned down."

"This portion would make nothing without immediate moisture."

This tells what the possibilities of the system are and I think we should all learn more of it.

W. D TREGO,
Arrowwood, Alta.

SHORT COURSE

Very general interest on the part of the farmers of the district in the possibilities of cattle raising, was shown by the large attendance at the Agricultural Short Course, commencing Tuesday afternoon. The subject was Beef and Dairy Cattle, G. G. Carlyle, Live Stock Commisisoner speaking on Dairy Cattle while Mr. Andres Assistant Deputy Minister of Agriculture, treated more particularly of beef cattle.

Messrs. Mydland and Stewart had brought in some very fine exhibits of cattle which were used for demonstration purposes.

Mr. Carlyle presented a strong case for the introduction of cows into general farming program for a number of reasons.

The dual purpose cow is especially good business furnishing a profitable side line with milk and baby beef. All dairy herds prove profitable to those with good available markets, and for a strictly dairy herd Ayreshires, Holsteins, Guernseys and Jerseys were recommended.

The average man however, although a wheat grower, is much more secure in developing side lines, and the dual purpose cow furnishes a most satisfactory answer. Amongst popular and proved breeds for this purpose are Shorthorns, Ayrshires, Red Polled. Not only do they produce fine calves, but the excess of milk may be put to excellent use in feeding pigs, poultry, etc.

The necessity for providing fodder crops for cattle would prove in the long run of greatest benefit to the soil. These crops of clover, etc., help the soil, clean it of weeds, strengthen it to such an extent that in time, the farmer will produce cleaner grain in greater yield of higher quality off his land, at the same time having also his herd of cows. Mr. Carlyle emphasized the value of the herds not only as money-makers in themselves, but because they drive the farmer to the fodder crop.

Mr. Andres, taking up the subject of beef cattle, spoke of the growing market for yearlings and two-year-olds of medium weight, rather than for the heavier three or four year old.

In buying cattle for feeding, the farmer must choose the age which he considers will yield him best profit in feeding. The two year olds having reached their growth may be finished most quickly for market. The yearling is slightly slower to come to market weight, but there is more often a dull market for this age and he may be bought more cheaply. The calf naturally makes the cheapest gain for the food consumer, but on the other hand, must be carried over the danger period after weaning.

Alberta farms are well adapted for all manner of fodder crops high in in protein value. The method of feeding is a matter of opinion. If grain is plentiful, the two year old may be fed almost unlimited grain, which brings more rapid growth and quicker finish. The self-feeding method of using grain has proved safe and profitable, using a smaller amount of roughage. In order that self-feeding may be safe, hand feeding should first be practiced to accustom the animal to certain grain quantities. And if animals are watered twice a day, there is no danger of their bloating.

Good breeding stock is a necessity to the farmer raising calves. No one can make a good finished steer from ill-formed breeding stock. Using the Shorthorn cow as an example, Mr. Andres demonstrated the points of excellence shown—broad muzzle and forehead, quiet eye, deep heart girth, good depth of rib, the roomy type, with broad hind quarters and pliable mellow skin.

The bull is said to be half the herd. He should be pure bred and any man raising commercial cattle with grade cows must have a pure bred bull. To aid the farmer, an item will be before the legislature this session, by which pure bred sires may be purchased by paying 25 per cent. purchase price, and the balance in three separate instalments.

The Shorthorn was also used to prove the excellent qualities as a dual purpose animal, and Mr. Andres spoke of the suitability also of the Hereford and the Aberdeen Angus.

Mr. Stephens, field crops commissioner and Mr. de Long of Lacombe agricultural school were the speakers on February 12, their subjects being Alfalfa, Sweet Clover and Seed Grains.

Mr. Stephens referred to this district as possessing the soil, climate and altitude for splendid farming results. It has always had favorable advertising for grain and livestock production while the day of big ranches is passing, it is hoped also that the day of exclusive wheat growing is passing.

There is need for the stabilization of agriculture, for the maintenance of the strength of the soil. Weeds are getting a serious hold on the west, and lack of proper method of crops rotation is causing a diminishing quantity of nitrate in the soil. The earth is being mined for grain.

Leguminous crops are the salvation of the farmer with their fibrous roots which choke down the weeds, supply nitrates to the soil and take the place of summer fallow. The use of leguminous crops in rotation will maintain the fertility of the soil. It is only by keeping up the high quality of Canadian wheat, that our farmers can compete successfully in the world's markets. And the quality can only be maintained by intelligent soil treatment.

Too many varieties of grain are being used by Southern Alberta farmers and in world competition uniformity of our product is important Amongst registered seed Marquis was highly recommended, with Reward most suitable for areas where Marquis may not ripen. Red Bobs requires that the season be just right.

For the benefit of Western farmers, there should be a statistical bureau of information giving the exact quantity of grain required for world maintenance, the production most profitable for Canada, etc. The farmer should have definite guide to grow in order to meet world market and bring best results to himself.

Mr. de Long speaking on leguminous crops, referred particularly to clover and alfalfa. The alfalfa is the hardier legume but the clover is justified in its heavier crop and return of fertility to the soil.

A grass mixture with the clover provides ideal feeding, and is better for stock than the straight clover. A crop rotation of sweet clover, and wheat has proved excellent in results. With a sowing of timothy grass with clover, in the first year a good stand will be taken, but the second season will bring a great crop.

Questions

"Is there danger of cutting sweet clover too short?" "Clover should be cut with a binder, not too short, but the second growth is more dependent on early cutting than on a heavy stubble."

"Which is the best, white or yellow clover?" "White blossom clover is considered most productive."

"Is clover good for cattle?" "It is considered splendid, and expert stock men use a mixture of green feed, clover and straw, fed by means of a self feeder. Sweet clover and rye grass prove the best crop to use on Alkali land."

Third Great West Canadian
FOLKDANCE FOLKSONG AND HANDICRAFTS
Festival
at **CALGARY**
MARCH 19 TO 22

Four days of lovely music and color, illustrating the Arts, Crafts and Song of the peoples of the prairie provinces—British, French-Canadian and European, with an American flavor of Cowboy songs.

Singers, Instrumentalists, Folkdancers from racial groups in the picturesque costumes of their country of origin.

Visiting Artists, including Isabelle Burnada, Selma Johansen de Coster (The Swedish Nightingale) and Charles Marchand, French-Canadian Folksinger.

Handicrafts organized by the Canadian Handicrafts Guild (Alberta Branch), Music and Folkdancing organized by the Canadian Pacific Railway.

ABOUT OIL

Turner Valley was rocked by an explosion recently when a large separator was hurled into the air at Regent oil well. The cause of explosion is unknown, but the well meanwhile has increased the flow of naphtha from 59 barrels per day to 100 barrels.

Associated well, near Home Oils will undergo a cleaning out process, with a diamond drill. This well fell from 7380 barrels in December to 6147 barrels in January.

British Dominion No. 2 is said to be one of the most consistent naptha producers in Turner Valley with over 120 barrels per day. The production up till January 31 amounted to $15-825.88 which looks very fine to the shareholders.

Home well No. 4 appears to be a great oil producer. When the last measurement was made, it was doing 300 barrels per day. It is said that No. 4 will equal the performance of No. 1 well which was brought into production about a year ago. The Home has had a big year with four big producers. Home No. 1 froze over recently and is being cleaned with a diamond drill.

Lowery Petroleum not far from Home wells is to the fore with a good showing of gas. The drill is in the upper part of the limestone.

OPEN BRANCH OFFICE

Western Canada Securities Co., head office at Vancouver, opened an office in Calgary under the management of Capt. W. B. Laycock, a partner in the firm. In making the announcement Capt. Laycock announced also that Western Canada Securities Co. has taken over the financial brokerage firm of Karelson Co., formerly located in the Herald Building.

Western Canada Securities Co., makes a specialty of investment brokerage service and is Western Canadian representative for the Monarch Royalties Corporation whose Class A preferred shares are listed on the New York Produce Exchange. This issue has wide distribution in Alberta and British Columbia.

Capt Laycock is well known in Calgary having lived in that city for about eight years prior to his service in the Great War. For considerable time he served as inspector of lands with the natural resources department of the Canadian Pacific Railway under Allan Cameron, superintendent. After the armistice he served with the Siberian Expeditionary Forces as transportation officer under Colonel F. S. Dennis. Since his return to Canada in 1919 he has been specializing in oil royalty investments.

A PACK OF CARDS

Serves as Bible, Almanac and Common Prayer Book

Here is a story which has been told and re-told for many years in company where two or three have been gathered together. We had a copy passed on to us with the request that we publish it for the benefit of those who enjoy such stories. Naturally the story is supposed to be true but we offer no guarantee.

A private soldier by the name of Richard Lee was taken many years ago before a Magistrate of Glasgow, Scotland, for playing cards during divine service, and the account of it is given as follows:

A sergeant commanded the soldiers at church, and while there the parson read the prayers, and took the text. Those who had a Bible took it out, but this soldier had neither Bible nor Common Prayer Book, but pulling out a pack of cards, he spread them before him. He first looked at one card and then at another. The sergeant of the company saw him, and said, Richard put the cards away; this is no place for them." "Never mind that," said Richard.

When the services were over the constable took Richard a prisoner, and brought him before the Magistrate. "Well," said the Magistrate, "what have you brought this soldier here for?" "For playing cards in church." "Well, soldier, what have you to say for yourself?" "Much, sir, I hope." "Very good! If not, I will punish you severely."

"I have been," said the soldier, "about six weeks on the march. I have neither Bible nor Common Prayer Book. I have nothing but a pack of cards, and hope to satisfy your Worship of the purity of my intentions." Then, spreading the cards before the Bailie, he began with the ace.

"When I see the ace it reminds me there is but one God. When I see the deuce, it reminds of Father and Son. When I see the three, it reminds me of Father, Son and Holy Ghost. When I see the four, it reminds me of the four evangelists that preached—Matthew, Mark, Luke and John. When I see the five, it reminds me of the wise virgins that trimmed their lamps. There were ten, but five were wise and five were foolish and were shut out. When I see the six, it reminds me that in six days the Lord made heaven and earth. When I see the seven, it reminds me that on the seventh day God rested from the great work which he had made, and hallowed it. When I see the eight, it reminds me of the eight righteous persons who were saved when God destroyed the world, viz. Noah and his wife, his three sons and their wives. When I see the nine, it reminds me of the nine lepers that were cleansed by our Saviour. There were nine out of ten who never returned thanks. When I see the ten, it reminds me of the ten commandments which God handed down to Moses on the tables of stone. When see the King it reminds me of the great King of Heaven, which is God Almighty. When I see the Queen it reminds me of the Queen of Sheba, who visited Solomon for she was as wise a woman as he was a man. She brought fifty boys and fifty girls all dressed in boys' apparel for King Solomon to tell which were boys and which were girls The King sent for water for them to wash. The girls washed to the elbows and the boys to the wrists; so King Solomon told by that."

"Well," said the Bailie, "you have described every card in the pack except one." "What is that?" "The Knave," said the Bailie.

"I will give your honor a description of that too if you will not be angry." "I will not," said the Bailie, "if you do not term me to be the Knave." "The greatest Knave I know is the constable that brought me here." "I do not know," said the Bailie, "if he is the greatest knave, but I know he is the greatest fool."

"When I count how many spots there are in a pack of cards I find 365 as many days as there are in a year. When I count the number of cards in a pack I find 52, the number of weeks in a year. I find there are 12 pictures in a pack representing the number of months in a year, and on counting the tricks I find 13—the number of weeks in a quarter. So you see a pack of cards serves for a Bible, Almanac, and Common Prayer Book."

SHELTER BELTS

While it is hard to determine the money value of shelter belts, yet the benefit from tree prtection is apparent to all who have grown them.

As shelter belts have increased throughout the West, so have gardens and even small fruits and other fruits are being safely grown if properly protected.

The Indian Head Nursery inspectors have followed up results from the plantations which have spread over the West from the Indian Read station. They find that of 7600 farms thus protected, 6800 had good vegetable gardens, 2700 were successfully growing berries and currents and about 400 had orchards with hardy strains of apples, plums and cherries.

And now Burlington, Ontario, has discovered shortages of $9,000,000 in the civic treasury.

A total of 2855 acres of reservoir site at the Ghost River dam will be converted into parks eventually.

WATER POWER

Hydro Electric Activity in Alberta Carried Out by Calgary Power Co.

The steady growth of water power development in Alberta during the past year reveals a programme of great activity. The Calgary Power Company completed and brought into operation in October, its 36,000 h.p. development at the Ghost site on the Bow River, about 30 miles west of Calgary. The company also extended its transmission systems throughout the province, bringing hydro-electric energy to Wetaskiwin, Camrose, Lacombe, Cardston, Pincher Creek, Macleod, the Turner Valley, and numerous smaller municipalities. An agreement was also made with the city of Edmonton for an interchange of power and a 132,000 volt transmission line will be completed early this year to carry power 175 miles from the Ghost development to Edmonton.

In adidtion to above a number of important projects are under active study some of which will undoubtedly materialize in the near future. It is apparent, therefore, that the rate of growth in the past two years will be maintained if not considerably increased.

It is interesting to note that the capital expenditure involved in development, transmission and distribution of this new power represents a considerable proportion of the total expenditure in building construction throughout Canada, the 1929 outlay will involve more than $75,000,000, while not less than $320,000,00 is likely to be required to complete the undertakings arranged for the next three years. Electric power is rapidly coming to the front and the Calgary Power Company may be depended upon to do their share in development work in this province.

THE E P IS NO FAD

Prof. Carlyle of the E.P. in speaking to the Kiwanis Club, Lethbridge, referred to his work on the E.P.,

The prince's Alberta ranch was not a fad or a hobby, nor a "dude" ranch, he declared, but an effort on the part of the prince to assist agriculture in Western Canada by the breeding of good stock. The prince's keeness for good horses, cattle and other stock comes from a long line of royal enthusiasts. King Edward and Queen Victoria took particular pride in their livestock while His Majesty King George has a fine appreciation of good animals. Whenever a thorough bred foals at the royal stables, said Prof. Carlyle, a wire is at once sent to the King informing him of the fact and of the condition of the mother and the offspring, a striking illustration of the intimate personal interest taken by his majesty in his horses.

"The Prince of Wales is a model landlord," continued Prof. Carlyle. "He is doing more in the way of forestration, for example, on his moor lands than is any province in the Dominion in its area." The prince owns the best Shorthorn herd in England, was another interesting bit of information given by the speaker.

INVESTMENT ITEMS

The split in C.P.R. stock on a four to one basis will be pleasing to shareholders. From a low $185 early last month the stock climbed to $225, an advance of $40 per share.

The new par value of C.P.R. stock will be $25 as against $100 for the old. The company has been paying a consistent ten per cent. right along and it will now pay $2.50 per share.

There is no stock so widely held in Canada as the C.P.R. With the split there will be a more active market for it as one can buy four of the new at the price of one of the old. Of late years employees of C.P.R. have been permitted to buy stock direct from the treasury on the installment basis which was good business for all concerned.

A tremendous factor in the decline of western business has been the decrease in wheat exports. Europe has 120,000,000 bushels of wheat less from North America since the present crop was harvested, than was sold to them a year ago.

The Con. Smelting Co. at Trail will soon enter into the fields of chemicals and chemical fertilizers. Among primary products will be pure hydrogen oxygen and nitrogen. This will mean bigger dividends in the future.

PROV ESTIMATES

Increases in Several Departments Estimates For Next Year

Amongst details of expenditure for next year, the Legislature announces an increase of $70,000 in educational grants and $43,000 for health laboratory work at the University of Alberta.

An increase of $100,000 in the health department goes largely to increased hospital grants.

Treasury department increases which include old age pensions, will amount to $146,000.

An increase of $500,000 is noted for main highways expenditure. A total of $2,000,000 is allowed this year for highways. An increase of $250,000 is booked for district highway construction. Secondary highways are allowed $150,000.

The building program is being decreased by about $500,000.

It is estimated that revenue increases for 1930 will come from the provincial treasurer's department; gasoline tax $500,000 increase; motor vehicles $293,000; theatre tax increase $50,000; corporations tax increase $97,000; succession duties $175 000; liquor revenues $50,000.

Estimated expenditure will be $21,-073,985 chargeable to income account and $8,765,564 chargeable to capital account.

Expenditures by departments: executive council, $381,137; legislation, $183,300; agriculture, $715,454.50; attorney general's, $1,678,998.33; education, $2,624,746.17; municipal affairs, $319,160; provincial secretary's $84,-916.63; public health $1,597,671.15; public works, $2,527,494; railways and telephones (railways branch) $39,-426.09; treasury, $1,082,113.

MAY BE MULTIPLY

"Televox" the mechanical man on display at one of the department stores in Calgary is apparently the finest kind of man. He does what he is told without talking back, and in consequence, ladies by the hundreds have gathered to watch him. In response to orders spoken in usual tones over the telephone, he raised a flag, operated mechanical toys, a vacuum cleaner, etc., and turned on and off electric lights.

The future may be worth while for women.

Speculation in grain is one of the year's crop is harvested. If wheat biggest factors contributing to the present condition of the wheat market and E. J. Garland, M.P., envisions the day when the League of Nations will be called upon to deal with short selling in food commodities. Every bushel of Canadian wheat now in storage will be required before this Canada next year.

now stored were sold at present prices it would bring $200,000,000 less than last year. In other words $200-000,000 less purchasing power. For every cent wheat rises in price it will mean two and a half million dollars added to the purchasing power of Canada next year.

Foot Troubles take the joy out of life

They steal your vitality and your peace of mind

Foot Comfort Expert

from Toronto will be here

Wednesday, February 26
